Sub: Improvements in living conditions required in ONGC Colony at Dehradun.

Sir,

It is a matter of concern that the present living conditions in ONGC colony, Dehradun are not good and are, in fact, way below the mark, particularly taking into account the Maha Navaratna stature of our organisation. Your kind attention is invited to the need to improve the living conditions at ONGC Colony, Dehradun, particularly the following:

1. The internal roads of ONGC Colony and parks inside the colony are in shabby condition. It is necessary that conditions of those roads and parks are brought upto the mark and a system be put in place for their regular maintenance & inspection so that the residents do not get a chance to point out any deficiency in their upkeep.
2. Security system inside the colony and also at main gate of the colony need to be beefed up so that the entry of unwanted persons and animals is restricted and residents are not put to any inconvenience on this account.
3. Adequate number of street lights need to be installed and no corner of the colony should have darkness. These should be regular check of street lights so that there is no room for any unwanted incident on this account.
4. There should be intercom facility in each flat along with DID facility.
5. There are repeated interruptions of electric supply in the colony, causing lot of inconvenience to the residents. It is necessary to install generator with sufficient capacity to provide uninterrupted supply of electricity to all the flats. The generator presently lying in the colony which is not functional since long, needs to be removed from the colony.
6. Water supply to the flats is erratic. Necessary system to provide uninterrupted supply of water for all residents needs to be put in place. The possibility to install overhead tanks may also kindly be looked into.
7. Maintenance of solar system needs to be improved and more solar system should be installed so as to cover all the flats. Proper servicing of solar system is also needed on regular basis.
8. Garbage removal system is not upto the mark. Necessary steps need to be taken for removal of garbage, so that living conditions of residents is not compromised.
9. System for check of the services being provided by the contractor in the colony should be introduced. RWA should be entrusted to keep checks on all related issues and to take up the same with the concerned authorities of ONGC.
10. Bachelor's accommodation should be fully furnished, along with all necessary amenities.
11. More number of car parking sheds should be constructed to accommodate as many vehicles as possible. If required, open parking spaces may also be provisioned.

Sir, you are requested to take immediate steps on the above points, so that the employees of ONGC residing in the ONGC colony do not face any kind of unnecessary hardship or inconvenience.

With warm regards,

(Ajay Singh Rawat)
