To,

The Chairman & Managing Director,
Oil and Natural Gas Corporation Limited
Jeevan Bharti, New Delhi.

Sub: Value added facility including broadband in the residential landline provided to executives

Ref: Office Order (8/2013) dated 26 January 2013 on Communication facilities

Sir,

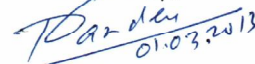

Communication has undergone enormous changes in the last decade and there is a compelling need to keep pace with the same. Our executives across all levels find it a basic necessity to have a landline connection at their residence with Value added facility including broadband as standard features. This helps them to stay in touch with their children and other family members who are studying / working abroad.

BSNL and MTNL, our service providers have special broadband packages that include specified units of free calls without differentiating between local & STD calls. It is widely felt by our executives that they cannot do away with the value added facilities on their residential telephone.

In view of the above, we would like to request that, value added facility including broadband may be allowed to all executives in their residential landline within the specified monthly ceiling on their bills. Often, it is found necessary to have some redundancy in the Internet connectivity. Broadband facility in the residential landline, in addition to the data card, will provide this redundancy and be supportive of our company's efforts to strengthen the use of modern communication systems.

With regards,

Yours truly,

(R.P.Pandey)
